

**INSTALLATION:**

Use threaded holes in the back of electromagnet to mount.

Apply 24 Volts DC to leads. Polarity is unimportant as electromagnets work equally well in forward or reverse polarity.

**MAINTENANCE INSTRUCTIONS:**

Electromagnets require very little maintenance to provide a long useful life. Daily use of a shop towel to wipe the face of the magnet free of debris, grease and oil or other foreign matter will ensure years of service life and thousands of safe lifts.
